EDUCATION

University of North Texas, Denton, Texas, USA
Master's in Computer Science

Aug 2025 – Jun 2027
GPA: 4.0/4.0

Bharath Institute of Higher Education and Research, Chennai, India
Bachelor of Technology in Computer Science Engineering

Aug 2018 – Jun 2022
GPA: 9.33/10.0

PROFESSIONAL EXPERIENCE

FootLocker, USA

Jun 2026 – Present

Software Engineering Intern

- Developed and maintained front-end features using JavaScript (ES6+) and modern web frameworks, building responsive, user-facing interfaces across store and e-commerce systems.
- Designed and implemented back-end services and REST APIs to support order management, store systems, and digital platforms, ensuring reliable data flow across interconnected applications.
- Collaborated with Quality Engineering (QE) teams to validate full-stack functionality across the enterprise technology ecosystem, including store systems, mobile applications (iOS and Android), and order management platforms.
- Reviewed, created, and enhanced QA artifacts test plans, test cases, test scripts, and regression automation suites to improve test coverage and efficiency.
- Coordinated with onshore and offshore QA teams and participated in Agile ceremonies (daily stand-ups, sprint planning, retrospectives), providing regular updates on testing progress, risks, and blockers.

University of North Texas, Denton, USA

Oct 2025 – May 2026

Graduate Teaching Assistant

- Facilitated the delivery of a graduate-level curriculum on **Python, Machine Learning and AI Fundamentals** for a cohort of **180+ students**, ensuring alignment with core learning objectives.
- Evaluated and critiqued **50+ technical assignments**, providing detailed feedback on algorithms and code efficiency that directly contributed to improved student project scores.
- Directed weekly mentorship sessions, clarifying complex theoretical concepts and debugging code to foster a deeper understanding of material for diverse learners.
- Orchestrated course administration, maintaining **100% accuracy in grading databases** and attendance tracking to support faculty operations.

Tata Consultancy Services, Chennai, India

Aug 2022 – Sep 2025
(2024-2025)

Client: Cotality – Machine Learning Operations Engineer

- Designed and deployed **AI-powered data pipelines** that ingest PDF/image documents, extract structured fields via **LLM (Gemini API) workflows**, and load results into downstream systems — reducing manual data-entry effort by **70%** across thousands of daily documents.
- Built **GenAI automation workflows** combining OCR pre-processing, **prompt engineering**, **few-shot examples**, and **JSON-schema-constrained outputs** to deliver reliable, parseable LLM responses at scale.
- Implemented **post-processing validation** (regex field checks, confidence-score thresholding, fallback rules) to reduce hallucinated outputs and improve downstream data quality and auditability.
- Developed and exposed extraction services as **REST APIs (FastAPI)**, containerized with **Docker**, and deployed as scalable microservices on **GCP Cloud Run** (analogous to AWS ECS/Fargate + Lambda patterns), improving model-serving latency by **40%** through batching, async I/O, and concurrency tuning.
- Engineered **automated data processing flows** integrating object storage (GCS; equivalent to AWS S3), Pub/Sub messaging, and event-driven triggers to handle high-volume document throughput.
- Integrated LLM-based AI features into client-facing apps and enhanced the **Xtractly Platform**, capturing user-correction feedback loops to drive continuous extraction-quality improvements.

- Authored MLOps documentation on versioning, monitoring, and retraining workflows; strengthened team knowledge sharing on **LLM evaluation, prompt design, and AI document processing best practices**.
- Recognized with **“Best Team Member – 2024”** for performance and collaboration.

Client: Now Pensions Limited - UK - Data Engineer

(2022-2024)

- Built and optimized **production data pipelines** processing **10M+ records**, applying **Python and advanced SQL** (window functions, CTEs, query plan analysis, indexing) to enhance pipeline performance and reliability.
- Led large-scale **data migration** from legacy systems to next-gen databases using **Talend ETL**, migrating millions of records with **zero data loss** — laying clean, production-grade foundations for downstream analytics and AI/ML workloads.
- Designed **automated data processing workflows** with scheduling, dependency management, error handling, and retry logic to ensure reliable end-to-end execution.
- Implemented **CI/CD pipelines** and containerized deployments (Docker, Kubernetes), reducing release cycle time by **30%** and enabling reproducible, auditable deployments.
- Collaborated in code reviews, quality audits, and data governance reviews to maintain compliance and engineering best practices.
- Awarded **“Best Team Member – 2022”** for project delivery excellence.

Tata Consultancy Services, Chennai, India

Software Engineer Intern

Feb 2022 – Jun 2022

Client: AVIVA – Full stack & NLP Engineer Intern (2022)

- Worked under TCS Client - Insurance company AVIVA and Developed a Real-Time Video Messaging model for Personalized Customer Experiences, including animation video generation.
- Utilized Natural Language Processing techniques (NLP) to generate Insurance premium details tailored to customer needs.

Ural Federal University, Ekaterinburg, Russia

Data Science Intern

Jun 2019 – Aug 2019

- Led a project focused on predicting Solar Power Generation for the day ahead, utilizing data collected from a solar power plant in Astrakhan, Russia.
- Awarded a Diploma in Energy Track and achieved 1st place in the project competition.
- Enhanced machine learning model performance using K-Fold cross-validation and fine-tuned model parameters.

TECHNICAL SKILLS

Language	:	Python, SQL , JavaScript (ES6+), Java, C++
AI / LLMs	:	OpenAI GPT APIs, Google Gemini API, prompt engineering, few-shot learning, RAG concepts.
Back-End APIs	:	ETL/ELT pipelines, Talend, automated data processing, data migration, data quality & validation.
Cloud DevOps	:	Docker, Kubernetes, GCP (App Engine, Cloud Run, Cloud Build CI/CD), AWS basics.
ML Framework:	:	PyTorch, scikit-learn, NLTK, spaCy
Courseworks	:	Data Structures & Algorithms, Analysis of Computer Algorithms, object-oriented design, DBMS (Data Base Mang. Sys.)

PROJECTS & RESEARCH WORKS

Full-Stack LLM Integration (Self-Project, 2024–2025)

Tools & Platform: NodeJS, OpenAI-API's & Netlify (Deployed) [LINK][<https://teja3d.netlify.app/>]

- Created a 3D Theme portfolio highlighting web development skills, featuring animations built with Java Script.
- Built a MERN-based application that integrates OpenAI GPT APIs to generate contextual responses for knowledge management systems. Used Three + Node.js + OpenAI - APIs, deployed via Docker + GCP Cloud Run.

MCP Learning Platform – Interactive web model (Under Development)

- Developed an interactive web module for the Model-Connector Protocol (MCP) Learning Platform, utilizing HTML, CSS, and JavaScript to present complex AI integration concepts through dynamic visuals and intuitive user navigation. Demonstrated expertise in front-end design and technical communication by transforming protocol architecture and use-cases into accessible, scalable, and visually engaging educational experiences for developers and enterprises. [LINK][<https://intro-to-mcp.vercel.app/>]

The Industrial Methods to Improve the Day-Ahead Solar Forecasting

- Developed Industry-Scale Photovoltaic Forecasting System – implemented machine learning-based photovoltaic forecasting system for a large-scale photovoltaic power plant within the Russian power system.
- Enhanced Forecasting Accuracy & Gained Expertise in Machine Learning Algorithms.
- Published a research paper in the Energies Journal with impact factor 5.0, 3500+ Views and 12+ Citations to the Paper. [\[LINK\]](https://www.mdpi.com/2072-4292/12/20/3420)[\[https://www.mdpi.com/2072-4292/12/20/3420\]](https://www.mdpi.com/2072-4292/12/20/3420)

Prediction of Solar Power Generation Based on Random Forest Regressor Model

- Successfully integrated retrospective metering data and open-source weather information to address feature identification and error metrics in the forecasting process. Demonstrated practical application by testing the system on a real solar power plant in the southern region of the Russian Federation. [\[LINK\]](#)

CERTIFICATIONS

-
- **Oracle Cloud Infrastructure 2023 Certified Application Integration Professional**
 - **Machine Learning Course by Andrew Ng – Coursera Stanford | online**
 - **How to Win a Data Science Competition: Learn from Top Kagglers – Coursera HSE-National University**
 - **Research Paper Presentation Certification at ICAECT 2020 – Springer Journal Conference**

POSITIONS OF RESPONSIBILITY

<u>Student Member, Institute of Electrical and Electronics Engineers (IEEE), Chennai, India</u>	<u>2020 – 2021</u>
<u>Core Organizer, Data Structures & Algorithms Club, BIHER (DSAC), Chennai, India</u>	<u>2021 – 2022</u>

HONORS & AWARDS

-
- **Won Hackathon and Received Diploma in Ural Federal University**
 - **Received a Grant of Rs 4,00,000 to Publish the Research Paper in Energies Journal.**
